WORK EXPERIENCE

Dayforce — Toronto, ON

Manager, Customer Deployment, Dayforce SWP — *September 2025 – Present*

Joined Agentnoon (Y Combinator) in September 2025; Agentnoon was acquired by Dayforce in October 2025.

- Led customer deployment for Dayforce Strategic Workforce Planning (SWP) after the acquisition, shifting the work from improving existing operations to standing up and scaling Dayforce, and served as sole implementer and primary contact for CVS Health, the largest customer.
- Selected to present a one-hour workforce-planning breakout at Dayforce Discover, the company's annual conference in Las Vegas.
- Built a first-principles workforce-spend analysis for Kenvue projecting a $41M USD reduction, with contingency included, and presented it to VP- and senior-leader audiences.
- Stood up the implementation network and advanced playbooks to scale deployment from 23 customers toward 1,200.
- Managed the development of 8 major feature sets for the application, and kept engineering unblocked by securing access to resources and teams across Dayforce.
- Shipped product changes hands-on, opening pull requests and releasing features with AI coding tools, and automated deployment workflows across Jira, Confluence, and the browser with Claude, Cursor, and Codex.

Deloitte Canada — Toronto, ON

Senior Consultant — *January 2023 – August 2025*

- Spearheaded the design and implementation of client's strategic workforce planning process during a 4-month secondment by leading stakeholder workshops, developing process frameworks, co-creating MVP tools, building an implementation roadmap, and piloting the end-to-end approach with cross-functional teams to gather feedback and drive progress.
- Developed data-driven tools and models using Excel, Power Query, and Power Pivot to support a workforce readiness assessment for a multi-million-dollar capital project by evaluating sourcing strategies, prioritizing skill gaps, and assessing organizational health metrics through custom decision matrices and risk indicators.
- Standardized and automated the firm's job mapping methodology by building a GenAI-powered Python tool, achieving 99% efficiency gains and 90% accuracy, resulting in $17K project savings and projected $400K in annual impact.

Consultant — *September 2020 – December 2022*

- Supported the design and development of the client's refreshed performance management program by supporting discovery workshops, synthesizing interview insights, and developing core deliverables (e.g., stakeholder personas, visual process flows and a high-level implementation roadmap), taking ownership of outputs to drive quality.
- Automated manual workflows using Python and VBA to streamline data consolidation, reporting, and computation tasks—saving 165 project hours across initiatives—and developed scalable Excel-based resiliency and business impact assessment tools adopted by 60 business units.

EDUCATION

University of Toronto *Faculty of Applied Science and Engineering* — Toronto, ON

Bachelor of Applied Science, Chemical Engineering — *Graduated May 2020*

Minor & Certificate: Advanced Manufacturing Technology; Engineering Business

Organizations: Phi Gamma Delta, Your Next Career Network, ChemE Mentorship, UofT Engineering Outreach, Sustainable Engineering Association, UofT Armenian Student Association

Capstone: 50,000 ton per year plant design for mass production of a styrene-butyl acrylate-acrylic acid latex product outlined in US Patent 5,847,030

Awards: RE/MAX Entry Scholarship (2015), Troost ILead Leaders of Tomorrow Award (2020)

SKILLS & INTERESTS

Proficient in: MS Suite (Excel, PowerPoint, Outlook, Visio, Project), PowerQuery, M/Dax/VBA, Python (OpenAI), Tableau

Agentic coding: Claude, Cursor, Codex, Conductor, Hermes, Paseo

Familiar with: React, TypeScript, Next.js, Linux (Ubuntu Server, NixOS, Debian), Proxmox VE, REST APIs, TensorFlow

Interests: Automation, Full-Stack Web Development, Travel, Photography, Mentorship, Cycling, Volleyball, Watchmaking
